Satya Samaikya Venna
Frontend Developer

Profile

Dedicated and detail-oriented Front-end Developer with a strong foundation in **HTML**, **CSS**, **JavaScript**, and **React.js**. Experienced in building dynamic, responsive user interfaces and contributing effectively within **Agile development teams**. Known for **Initiative**, **Adaptability**, and a strong collaborative spirit that drives successful project outcomes.

Work experience

present
↑
Nov 2024

Frontend Developer
SITA.dev, Stockholm

- Collaborated in a fast-paced **Agile development environment**, participating in **daily stand-ups**, sprint planning, and retrospectives to ensure alignment and timely delivery of features.
- Tracked and managed user stories and development tasks using **GitHub Projects**, ensuring clear workflow visibility and version control through pull requests and code reviews.
- Utilized **Jira** for sprint planning, issue tracking, and managing cross-functional dependencies, enabling better coordination across teams and streamlined project execution.
- Worked closely with UI/UX designers and backend developers to integrate APIs, enhance performance, and ensure responsive design best practices were consistently applied.
